Buckskin Lake Landing Only AIS Monitoring Report

WBIC: 2272600
Previous AIS Findings: Chinese Mystery Snail, Narrow Leaf Cattail, Purple Loosestrife, Yellow Iris
New AIS Findings: None
Field Date: August 19th, 2017
Field Crew: Thomas Boisvert, AIS Project Assistant, Oneida County Land and Water Conservation Department
Report by: Thomas Boisvert

On August 19th, 2017, Thomas Boisvert, AIS Project Assistant, headed to Buckskin Lake to perform an AIS landing check. The main duties performed at AIS landing checks are to inspect shoreline vegetation, shallow aquatic vegetation, deeper aquatic vegetation (via rake), to look for invasive animals, and to replace old signs if needed. Monitoring is usually completed along a 100-150 foot stretch on both sides of the boat launch.

Buckskin Lake is located in both Oneida and Vilas Counties in Wisconsin, and has one public boat landing. This public boat landing can be found down Bo Di Lac Road, off of State Highway 70. The shoreline near the landing is a mix of sand, rock, and muck, has downed woody debris, and holds a variety of native plants.

Buckskin Lake is 642 acres and already contains four invasive species. According to the WDNR, Chinese Mystery Snails, Narrow Leaf Cattail, Purple Loosestrife, and Yellow Iris are already present on the lake. Luckily, when conducting the AIS landing check, no present or new invasive species were found at this landing.

Findings:

Aquatic Invasive Species:

No new invasive species were found.
