Madeline Lake Landing Only AIS Monitoring Report

WBIC: 1544700
Previous AIS Findings: Banded Mystery Snail, Chinese Mystery Snail, Purple Loosestrife, Rusty Crawfish
New AIS Findings: None
Field Date: July 5, 2017
Field Crew: Aubrey Nycz, AIS Project Leader and Thomas Boisvert, AIS Project Assistant, Oneida County Land and Water Conservation Department
Report by: Thomas Boisvert

On July 5, 2017, Aubrey Nycz, AIS Project Leader and Thomas Boisvert, AIS Project Assistant, headed to Madeline Lake to perform an AIS landing check. The main duties performed at AIS landing checks are to inspect shoreline vegetation, shallow aquatic vegetation, deeper aquatic vegetation (via rake), look for invasive animals, and replace old signs if needed. A GPS unit is used in order to mark where the AIS check is performed, and to also mark invasive organisms if found.

Madeline Lake is located in both Oneida and Vilas Counties in WI, and has one public boat landing. This public boat landing can be found off of Highway J, down Madeline Lake Road. The shoreline near the landing is a mix of both sand and muck, has downed woody debris, and holds a variety of native plants.

Madeline Lake is 172 acres and already contains a variety of invasive species. According to the WDNR, Chinese Mystery Snails, Banded Mystery Snails, Purple Loosestrife, and Rusty Crawfish are already present on the lake. Luckily, when conducting the AIS landing check, no present or new invasive species were found at this landing.

Findings:

Aquatic Invasive Species:

No new invasive species were found.
