Oneida Lake Landing Only AIS Monitoring Report

WBIC: 1518200
Previous AIS Findings: Chinese Mystery Snail, Eurasian Water Milfoil, Rusty Crawfish
New AIS Findings: None
Field Date: July 5, 2017
Field Crew: Aubrey Nycz, AIS Project Leader and Thomas Boisvert, AIS Project Assistant, Oneida County Land and Water Conservation Department
Report by: Thomas Boisvert

On July 5, 2017, Aubrey Nycz, AIS Project Leader and Thomas Boisvert, AIS Project Assistant, headed to Oneida Lake to perform an AIS landing check. The main duties performed at AIS landing checks are to inspect shoreline vegetation, shallow aquatic vegetation, deeper aquatic vegetation (via rake), look for invasive animals, and replace old signs if needed. A GPS unit is used in order to mark where the AIS check is performed, and to also mark invasive organisms if found.

Oneida Lake is located in Oneida County, WI, and has one private boat landing. This private boat landing can be found down Oneida Lake Road at the Alpine Resort. The shoreline near the landing is a mix of both sand and muck, has downed woody debris, and holds a variety of native plants.

Oneida Lake is 255 acres and already contains three invasive species. According to the WDNR, Chinese Mystery Snails, Eurasian Water Milfoil, and Rusty Crawfish are already present on the lake. Luckily, when conducting the AIS landing check, no present or new invasive species were found at this landing.

Findings:

Aquatic Invasive Species:

No new invasive species were found.
